

Training for Excellence....Planning for Success

NFB Training is delighted to launch their new 2010 inTraining brochure detailing a wide ranging portfolio of workshops and initiatives which is available to download by clicking here:

<http://www.builders.org.uk/training/portfolio.aspx>

Our 2010 portfolio includes courses covering the legislative and regulatory requirements of health & safety and employment, as well as personal and business development programmes, including the well received Bid to Win Toolkit range.

In addition, we have developed a new collection of courses covering sustainability. These exciting additions are aimed at operative level, as well as middle and senior management, all designed to give companies a real competitive edge.

Opportunities include:

- **Sustainable Procurement:**
Enabling delegates to understand and develop a sustainable procurement strategy that can be put into practice to support company development and build a sustainable future.
- **Introduction To BREEAM**
Ensuring delegates have a clear understanding of the various BREEAM standards applicable to new build, refurbishment and existing buildings.
- **Understanding Environmental Legislation – Do's & Don'ts For Construction Sites**
This workshop will enable site teams to understand the key environmental legal requirements which apply to construction activities.
- **Introduction To The Code For Sustainable Homes**
Ensure delegates understand the Code aims, objectives and requirements and are aware of the process to achieve a Code rating.

Full details of all our courses, including how to book on line, funding opportunities and up to date industry information, can be found on our website www.nfbtraining.co.uk.

Our flexible and personal approach ensures that learning can be delivered within a convenient timeframe, to meet the needs of your projects, staff time and deadlines. Should you have any specific training requirements please contact the Training Team.
