LIVERPOOL BUSINESS JOINS CONSTRUCTION'S ELITE

Liverpool-based Maghull Construction has been crowned one of the UK's fastest growing construction companies in a new league table published by industry magazine Construction News and in association with trade body the National Federation of Builders (NFB).

Maghull Construction, which was founded in 1983, forms part the Maghull Group alongside its development and investment arms. The firm has delivered in excess of £250m of construction value, specialising in the restoration of Grade II listed structures and working as the main contractor to Maghull Developments.

Most recently, Maghull Construction – a long standing member of the NFB – has been working on the final phase of PGA national residential golf academy, Formby Hall Golf Resort & Spa and won a Built In Quality award from Manchester City Council for the conversion of three Grade II listed mills into a 201 luxury apartment scheme, The Met Apartments.

The firm finished 50th overall.

The 'Fastest Growing Companies in Construction' is an inaugural league table of construction firms that have demonstrated the highest rate of growth over a five-year period. The full list which can be seen on www.cnplus.co.uk includes some of the industry's biggest names.

Tony Martin, managing director of Maghull Construction said: "Recognition of any sort is wonderful but to be ranked alongside some of the industry's biggest names is an incredible achievement. We've achieved strong growth over the last five years and it is a firm testament to the experience of our team and ongoing client relationships."

Julia Evans, chief executive of the NFB, said: "This is a fantastic achievement by Mahull to accomplish both a high rate and consistency of growth. One of the biggest challenges facing successful firms is how they cope with the impact of their success.

"For decades, we've been helping thousands of firms big and small tackle the challenges presented by the industry with specialist services and support, from training to advice and from networking to lobbying.

“No less than eight of our own member companies featured on the list, demonstrating how the NFB can be a real partner for growth.”
